UC Davis lists core, major, and elective units across multiple catalogs, but the system updates annually. New prerequisites, altered lab sections, and shifting general education (GE) patterns mean that a plan built in freshman year can quickly become outdated. The main pitfall is treating the catalog as a static document rather than a living guide. Benefit: Regularly reviewing the latest catalog prevents surprise blocks that could push graduation dates. Caution: Ignoring catalog changes may lead to taking extra. Start with a “must-take” list: core UC Davis units, major prerequisites, and any required labs. Plot these on a spreadsheet, assigning each to the earliest semester where the prerequisite chain allows enrollment. Then layer in electives that satisfy GE or personal interests, reserving at least one open slot per term for unforeseen offerings. This buffer protects you when a required class fills up or a professor cancels a section.
